## **Ch-13 Our Environment**

- 1. What are decomposers? Write their importance with respect to our environment.
- 2. Write the causes of depletion of ozone layer. How can we prevent it?
- 3. Explain the formation of ozone layer.
- 4. What are food chains and food webs? Why are smaller food chains better?
- 5. Energy flow in a food chain is unidirectional. Explain.
- 6. Give any three methods to reduce the problem of waste disposal.
- 7. Differentiate between natural and artificial ecosystem.
- 8. Write the full form of UNEP.
- 9. Write the names of any two decomposers.
- 10. What is bad ozone?
- 11. Why are plastic bags non-biodegradable?
- 12. Name two decomposers and two producers.
- 13. Why are pesticides considered as pollutants despite being useful to the farmers?
- 14. Name two artificial eco-system.
- 15. What is the role of consumers in the food chain?
- 16. Give one advantage and one disadvantage of ozone.
- 17. Difference between biodegradable and non-biodegradable substance.
- 18. Why are green plants called producers?
- 19. What are the two main components of our environment?
- 20. Classify the following as producers and decomposers green plants, bacteria, fungi, blue-green algae.
- 21. Name any two abiotic components of environment.
- 22. Which disease is caused in human beings due to depletion of ozone layer?
